(241SS) MEDALS OF MEXICO

Volume II (1821-1971) by F. W. Grove

A monumental work, the best book ever on Mexican numismatics, featuring medals for a period of 150 years. This work which took 5 years of research, covers medals of Mexico from its early independence in 1821 to the present. It covers medals issued under the Emperor Iturbide. After his short reign, medals were issued during the 40-year Republican Period. During the French Intervention, lasting four years (1863-1867) and upon the reestablishment of the Republic by Benito Juarez in 1867 to the present, hundreds of private, provincial, revolutionary, and federal medals were struck to commemorate both world-shaking and minor events. The author has additionally included a special section on medals issued for advertising by corporations and the like. The book throughout is laced with many interesting comments on many of the historical events which contribute to the rich, historic, and cultural background of Mexico.

This book contains a total of 480 pages (2½ times the size of Volume 1, covering the Colonial Period). About 1,500 illustrations on glossy paper, evaluations included on each medal, hard bound with golden eagle embossed. This is truly the most well-researched work on Mexican numismatalogy, possible only after five years of painstaking research. You may order directly from us at
